Community Banking

# Bring your energy efficiency ideas to life.

## EXPERT INSIGHT

Understanding the way your community building uses energy and resources is the first step to giving it an affordable, efficient future.

With *Sustainable Communities Wales*, you can benefit from up to **4 days of dedicated support** from an expert — analysing your bills, surveying your site and delivering a **detailed report and recommendations** for how to improve efficiency.

## REAL-WORLD PLANS

We don't want to see ideas and opportunities remain on the drawing board. We want them to get off the ground and become reality, which is why more complex projects can access free **specialist technical support** and commission a thorough **feasibility study** to ensure your community invest in the solutions that make most sense.

## SENSIBLE FINANCE

Community energy efficiency projects can fail to materialise because raising capital or maintaining repayments is too difficult.

It's up to you how you finance improvements, but SCW groups are eligible for an **interest-free loan** from *Robert Owen Community Banking*, whose unique approach ensures your organisation will only take on financial commitments that it can comfortably meet.
